TELESPHERE LAS VEGAS ANNOUNCES EXPANSION PLAN

Las Vegas to Become Hub for California Markets

LAS VEGAS, NV (July 7, 2010) – [Telesphere](#), a nationwide [hosted PBX](#) business phone and Internet services provider, today announced the planned expansion of their Las Vegas sales force in the immediate future, as well as other key sales and support [positions](#). Over the past two years, Telesphere’s investors continued to show confidence in Telesphere’s business model, providing \$35 million in additional capital. This amount is the most capital raised by any venture backed privately held company in Arizona during that period, and continues to strengthen Telesphere’s position in the marketplace as a leader in the hosted VoIP space.

In addition to the increase in their Las Vegas sales force, Telesphere’s upcoming expansion will include the hiring of a project manager, a lead sales engineer, and an Indirect Channel Manager in California. The California presence will provide an opportunity for Telesphere Las Vegas to serve as a regional support hub to future California personnel.

“As investors in Telesphere and such a staple in the Las Vegas community, we are pleased to see Telesphere expanding in our local market,” said Gary O’Malley, Senior Vice President of Greenspun Corporation and Board Member for Telesphere. “Their eagerness to pursue ambitious business telecom initiatives has contributed to their fast growth and will lead them to continued success in the future.”

“As Telesphere’s first expansion site we felt Las Vegas was best positioned to take on the responsibility that accompanies a market as large as California,” stated [Clark Peterson](#), CEO of Telesphere. “I am pleased that as the market matures, Telesphere’s rapid growth and road map for success continues to solidify our position as a leader in hosted PBX business phone and internet services.”

Headquartered in Phoenix, Arizona, Telesphere offers a customized [VoIP business solution](#) for every business, with additional offices in Salt Lake City, UT, Denver, CO, Portland, OR, and Minneapolis, MN. Their complete voice and data solutions provide customers with feature rich and attentive service without the cost, hassle, and limitations of traditional systems involving multiple vendors and lack of accountability.

About Telesphere

Telesphere is a nationwide business phone and Internet services provider that delivers an innovative package of hosted VoIP telephone services and Internet access to businesses throughout the United States. As one of the first companies to offer hosted enterprise level communications as a service (CaaS), Telesphere allows businesses to enjoy all the latest voice and data features of large enterprises without costly investment in on-premises equipment. Telesphere's more than six years of CaaS experience to businesses throughout the United States places it at the forefront of companies that specialize in the convergence of office PBX phone service, cellular phones, PCs and Unified Communications features. Telesphere fully manages its customers' services over a private IP facilities-based network.
