## TELESPHERE ANNOUNCES CHANNEL PROGRAM EXPANSION

*Cloud Communications Provider Telesphere Announces Three New Hires to Support Indirect Channel*

**Phoenix, AZ (September 28, 2010)** – [Telesphere](#), a nationwide [hosted PBX](#) business phone and Internet services provider, today announced the expansion of their Channel Program with the hire of three new employees solely dedicated to the Indirect Channel.

The new hires are:

- Joe Testa – Indirect Channel Manager, Orange County, CA. Mr. Testa will support California and Nevada agents.
- David Hill – Indirect Sales Solution Engineer, Las Vegas, NV. Mr. Hill will be fully dedicated to supporting indirect partners as a solutions engineer.
- Jill Besse – Indirect Sales Assistant, Scottsdale, AZ. Ms. Besse will provide pre- and post-sales support for channel partners.

Headquartered in Phoenix, Arizona, Telesphere offers a customized [VoIP business solution](#) for every business, with additional offices in Las Vegas, NV, Salt Lake City, UT, Denver, CO, Portland, OR, and Minneapolis, MN. Their complete voice and data solutions provide customers with feature rich and attentive service without the cost, hassle, and limitations of traditional systems involving multiple vendors and lack of accountability.

### About Telesphere

Telesphere is a nationwide business phone and Internet services provider that delivers an innovative package of hosted VoIP telephone services and Internet access to businesses throughout the United States. As one of the first companies to offer hosted enterprise level communications as a service (CaaS), Telesphere allows businesses to enjoy all the latest voice and data features of large enterprises without costly investment in on-premises equipment. Telesphere's more than six years of CaaS experience to businesses throughout the United States places it at the forefront of companies that specialize in the convergence of office PBX phone service, cellular phones, PCs and Unified Communications features. Telesphere fully manages its customers' services over a private IP facilities-based network.
